Is your clinic the one the AI recommends?

How patients ask

Patients ask the AI the way they used to ask a friend.

Name, price, doctor. Facts and reviews decide who gets named.

Questions we track

Four questions from the Gulf

«أفضل عيادة أسنان في الكويت»

“best dermatologist in Riyadh”

«كم سعر الفيلر في دبي»

“IVF clinic in Doha with good reviews”

Written the way people type them, in Arabic and in English.

What gets a clinic named

Three things we fix

01 Doctor and price facts: a facts page per doctor and treatment, with prices stated.

02 Reviews the AI reads: Google, local directories and the forums patients use.

03 Arabic questions, answered: pages written the way patients ask, not translated brochures.

A common question

Can the AI say wrong prices for my clinic?

Yes, and it often does, because it reads old pages. We find the wrong facts, fix the sources, and re-check monthly.

See how the AI answers about your clinic.
