Can AI crawlers read your site?

GEO Readiness Checker

A free tool. Usually 5–20 seconds.

Enter a domain or a full page URL. We read the page and report what we measured.

What it checks

Three questions about your page

01 May AI crawlers read it?

02 Is your brand clear as an entity?

03 Is the content easy to quote and cite?

What it covers

Five things the tool reads

+ AI search and training crawlers in robots.txt

+ Google indexing and snippet controls

+ Brand entity: Organization schema and profiles

+ Answer-ready content and outbound citations

+ Structured data, sitemap and llms.txt

To be honest

The tool only shows how ready the page is.

It doesn’t show whether AI engines mention you. For that, there is the free GEO report.
