Is your restaurant the one the AI recommends?

How diners ask

Occasion-based questions: family dinner, brunch, business lunch.

Reviews and local guides feed the answer.

Questions we track

Four questions from the Gulf

«أفضل مطعم عشاء عائلي في الكويت»

“best brunch in Dubai Marina”

«فندق في صلالة للعائلات»

“restaurants in Riyadh with private rooms”

Written the way people type them, in Arabic and in English.

What gets a restaurant named

Three things we fix

01 Menu, hours and booking stated: a facts page with menu prices and private rooms.

02 Local guides and reviews: food blogs and review sites, with your real details.

03 A site that loads on a phone: fast, bilingual, with a menu people and the AI can read.

A common question

Instagram is where my customers are. Why does the AI matter?

Because “best brunch in Dubai Marina” is now asked to ChatGPT, and it answers from guides and reviews, not from Instagram.

See how the AI answers about your restaurant.
