Two languages measured

In Arabic

Region-wide Arabic prompts

How the AI answers when no country is named. Brands that win here own the category, not just a city.

Asked in Arabic

Four questions we track

«أفضل متجر إلكتروني في الوطن العربي»

«أفضل شركة طيران في الشرق الأوسط»

«أفضل بنك للمقيمين في الخليج»

«أفضل تطبيق لتعلم العربية»

Written the way people type them, not translated.

In English

The English layer of the region

Expats, B2B buyers and investors ask in English, and the sources the AI reads are regional press and Reddit.

Asked in English

Four questions we track

“best e-commerce site in the Middle East”

“best places to live in the Gulf”

“best international school in the GCC”

“best fintech app in MENA”

The same questions in English, for English-speaking buyers in the same market.

Sources

What the engines cite most

01 Arabic:

Al Jazeera · Asharq Al-Awsat

Al Arabiya · Wikipedia Arabic

02 English:

Gulf News · Arab News

The National · Wamda · Reddit

Every measurement runs in both languages.
